	<b>Περίληψη Πρόσκλησης:</b>	<p>Objectives</p> <p>ERC Consolidator Grants are designed to support excellent Principal Investigators at the career stage at which they may still be consolidating their own independent research team or programme. Applicant Principal Investigators must demonstrate the ground-breaking nature, ambition and feasibility of their scientific proposal. Size of ERC Consolidator Grants</p> <p>Consolidator Grants may be awarded up to a maximum of EUR 2 000 000 for a period of 5 years (The maximum award is reduced pro rata temporis for projects of a shorter duration. This does not apply to ongoing projects).</p> <p>However, up to an additional EUR 750 000 can be requested in the proposal to cover (a) eligible "start-up" costs for Principal Investigators moving to the EU or an Associated Country from elsewhere as a consequence of receiving the ERC grant and/or (b) the purchase of major equipment and/or (c) access to large facilities (As any additional funding is to cover major one-off costs it is not subject to pro-rata temporis reduction for projects of shorter duration. All funding requested is assessed during evaluation).</p> <p>Profile of the ERC Consolidator Grant Principal Investigator</p> <p>The Principal Investigator shall have been awarded their first PhD over 7 and up to 12 years prior to 1 January 2018. The effective elapsed time since the award of the first PhD can be reduced in certain properly documented circumstances (see ERC Work Programme 2018).</p> <p>A competitive Consolidator Grant Principal Investigator must have already shown research independence and evidence of maturity, for example by having produced several important publications as main author or without the participation of their PhD supervisor. Applicant Principal Investigators should also be able to demonstrate a promising track record of early achievements appropriate to their research field and career stage, including significant publications (as main author) in major international peer-reviewed multidisciplinary scientific journals, or in the leading international peer-reviewed journals of their respective field. They may also demonstrate a record of invited presentations in well-established international conferences, granted patents, awards, prizes etc.</p>

<b>2</b>	<b>Πρόγραμμα:</b> <b>Τίτλος:</b>  <b>Κωδικός:</b> <b>Ερευνητικές Περιοχές:</b> <b>Δικαιούχοι:</b> <b>Φορέας Κοινοποίησης:</b> <b>Ημερομηνία Δημοσίευσης:</b> <b>Προθεσμία Υποβολής:</b> <b>Περίληψη Πρόσκλησης:</b>	Marie Sklodowska-Curie actions H2020 - Call for Proposals – Co-funding of regional, national and international programmes H2020-MSCA-COFUND-2019 Όλες οι Θεματικές Περιοχές Φυσικά & Νομικά Πρόσωπα EUROPEAN COMMISSION-DIRECTORATE GENERAL FOR RESEARCH AND INNOVATION 27-10-2017 <b>26-09-2019</b> Objective: The COFUND scheme aims to stimulate regional, national or international programmes to foster excellence in researchers' training, mobility and career development, spreading the best practices of the Marie Sklodowska-Curie actions. This will be achieved by co-funding new or existing regional, national, and international programmes to open up to, and provide for, international, intersectoral and interdisciplinary research training, as well as transnational and cross-sectoral mobility of researchers at all stages of their career. Scope: Each proposal funded under the COFUND scheme must have a sole beneficiary that will be responsible for the availability of the necessary complementary funds to execute the proposal. Applicants submit multi-annual proposals for new or existing doctoral programmes or fellowship programmes which are expected to have an impact on enhancing research- and innovation related human resources on regional, national or international level. Applicants having benefited from COFUND under previous calls (under the Seventh Framework Programme or under Horizon 2020) must explain how their proposal adds value in relation to the excellence and/or the impact award criteria, compared to their previous grant(s). As an example, added value could take the form of increased networking with organisations in less represented countries or capacity building measures there to further structure the European Research Area. Researchers supported under this scheme shall comply with the mobility rules of the Marie Sklodowska-Curie actions. Limitations regarding the researchers' origin and destination should be avoided. Support cannot be awarded to researchers who are already permanently employed by the organisation hosting them. Proposed programmes are encouraged to cover all research disciplines ("bottom-up"), but can also focus on specific disciplines. In this case the range of covered disciplines should allow reasonable flexibility for the researchers. Programmes that prioritise specific research disciplines based on national or regional Research and Innovation Strategies for Smart Specialisation (RIS3 strategies) can also be supported. Synergies with the European Structural & Investment Funds (ESIF) are encouraged [1]. COFUND takes the form of: A) Doctoral programmes Doctoral programmes address the development and broadening of the research

competencies of early-stage researchers. The training follows the EU Principles on Innovative Doctoral Training. Substantial training modules, including digital ones, addressing key transferable skills common to all fields and fostering the culture of Open Science, innovation and entrepreneurship will be supported. Collaboration with a wider set of partner organisations, including from the non-academic sector, which may provide hosting or secondment opportunities or training in research or transferable skills, as well as innovative and interdisciplinary elements of the proposed programme, will be positively taken into account during the evaluation. Each researcher must be enrolled in a doctoral programme. Attention is paid to the quality of supervision and mentoring arrangements as well as career guidance. The selection procedure for doctoral candidates must be open, transparent and merit-based. The vacancy notice must include the minimum gross salary offered to the researcher, as set out in the proposal.

**B) Fellowship programmes**

Fellowship programmes fund individual research training and career development fellowships for experienced researchers. The programmes supported should have regular selection rounds following fixed deadlines or regular cut-off dates, allowing fair competition between the researchers applying. The selections should be based on open, widely advertised competition (the vacancy notice must include the minimum gross salary offered to the researcher, as set out in the proposal), with transparent international peer review and the selection of candidates on merit. Mobility types supported by fellowship programmes may be similar to the ones supported under Marie Skłodowska-Curie Individual Fellowships. On top of transnational mobility, applicants are encouraged to include elements of cross-sectoral mobility and interdisciplinarity into their programmes. Fellowship programmes should be based on individual-driven mobility, i.e., researchers should be able to freely choose a research topic and the appropriate organisation to host them, fitting their individual needs.

Given that the aim of the co-funded fellowship programmes is the support of individual fellows, research teams will not be funded.

<b>3</b>	<b>Πρόγραμμα:</b> Marie Sklodowska-Curie actions <b>Τίτλος:</b> H2020 - Call for Proposals – Innovative Training Networks <b>Κωδικός:</b> H2020-MSCA-ITN-2019 <b>Ερευνητικές Περιοχές:</b> Όλες οι Θεματικές Περιοχές <b>Δικαιούχοι:</b> Φυσικά & Νομικά Πρόσωπα <b>Φορέας Κοινοποίησης:</b> EUROPEAN COMMISSION-DIRECTORATE GENERAL FOR RESEARCH AND INNOVATION <b>Ημερομηνία Δημοσίευσης:</b> 27-10-2017 <b>Προθεσμία Υποβολής:</b> <b>15-01-2019</b> <b>Περίληψη Πρόσκλησης:</b> Objective: The Innovative Training Networks (ITN) aim to train a new generation of creative, entrepreneurial and innovative early-stage researchers, able to face current and future challenges and to convert knowledge and ideas into products and services for economic and social benefit. ITN will raise excellence and structure research and doctoral training in Europe, extending the traditional academic research training setting, incorporating elements of Open Science and equipping researchers with the right combination of research-related and transferable competences. It will provide enhanced career perspectives in both the academic and non-academic sectors through international, interdisciplinary and intersectoral mobility combined with an innovation-oriented mind-set. Scope: ITN supports competitively selected joint research training and/or doctoral programmes, implemented by partnerships of universities, research institutions, research infrastructures, businesses, SMEs, and other socio-economic actors from different countries across Europe and beyond. Partnerships take the form of collaborative European Training Networks (ETN), European Industrial Doctorates (EID) or European Joint Doctorates (EJD). Each programme should have a clearly identified supervisory board co-ordinating network-wide training and establishing active and continuous communication and exchange of best practice among the participating organisations to maximise the benefits of the partnership. The programme should exploit complementary competences of the participating organisations, and enable sharing of knowledge, networking activities, the organisation of workshops and conferences. Training responds to well identified needs in defined research areas, with appropriate references to inter- and multidisciplinary fields and follows the EU Principles for Innovative Doctoral Training. It should be primarily focused on scientific and technological knowledge through research on individual, personalised projects. In order to increase the employability of the researchers, the research training should be complemented by the meaningful exposure of each researcher to the non-academic sector. Secondments of the researcher to other beneficiaries and partner organisations are encouraged, but should be relevant, feasible, beneficial for the researchers and in line with the project objectives. Substantial training modules, including digital ones, addressing key transferable skills common to all fields and fostering the culture of Open Science, innovation and entrepreneurship will be supported.

In order to reflect the new modus operandi of research supporting the development of open science, training should prepare early-stage researchers for increased research collaborations and information-sharing made possible by new (digital) technologies (e.g. collaborative tools, opening access to publications and to research data, FAIR[1] data management, public engagement and citizen science, etc.). A Career Development Plan should be established jointly by the supervisor(s) and each early-stage researcher recruited by the selected network. In addition to research objectives, this plan comprises the researcher's training and career needs, including training on transferable skills, teaching, planning for publications and participation in conferences.

Attention is paid to the quality of supervision and mentoring arrangements as well as career guidance. Joint supervision of the researchers is mandatory for EJD and for EID, and encouraged in ETN. In EID, the joint supervision of the researcher must be ensured by at least one supervisor from the academic sector and one supervisor from the non-academic sector. These arrangements will be taken into account during the evaluation of the proposal.

In EID and EJD, fellowships offered to early-stage researchers should lead to a doctoral degree. EJD result in joint[2], double or multiple doctoral degrees[3] awarded by institutions from at least two different countries, primarily within Europe.

In EID and EJD, enrolment in a doctoral programme and the creation of a joint governance structure - with joint admission (EJD only), selection, supervision, monitoring and assessment procedures - is mandatory. These arrangements will be taken into account during the evaluation of the proposal.

The scheme fosters a shared culture of research and innovation that welcomes and rewards creativity and entrepreneurship and helps to turn creative ideas into innovative products, services or processes. Scope: RISE involves organisations from the academic and non-academic sectors (in particular SMEs), based in Europe (EU Member States and Horizon 2020 Associated Countries) and outside Europe (third countries). Support is provided for the development of partnerships in the form of a joint research and innovation project. This is aimed at knowledge sharing via international as well as intersectoral mobility, based on secondments of research and innovation staff (exchanges) with an in-built return mechanism. The organisations constituting the partnership contribute directly to the implementation of a joint research and innovation project by seconding and/or hosting eligible staff members. Secondments shall always take place between legal entities independent from each other[1]. RISE should exploit complementary competences of the participating organisations, as well as other synergies, and enable networking activities, organisation of workshops and conferences to facilitate sharing of knowledge, new skills acquisition and career development for research and innovation staff members. RISE proposals can focus either on one dimension of mobility (intersectoral / international), or include a combination of both. Exchanges can be for both early-stage and experienced researchers and can also include administrative, managerial and technical staff directly involved in the research and innovation activities of the proposal. Support for the exchanges between institutions within Europe (EU Member States and Horizon 2020 Associated Countries) covers only intersectoral secondments. Exchanges with institutions from and to third countries can be intersectoral as well as within the same sector. Secondments between institutions established in third countries or within the same EU Member State or Horizon 2020 Associated Country will not be supported.

	<b>Ημερομηνία Δημοσίευσης:</b>	27-10-2017
	<b>Προθεσμία Υποβολής:</b>	<b>27-09-2018</b>
	<b>Περίληψη Πρόσκλησης:</b>	<p>Objective:</p> <p>The COFUND scheme aims to stimulate regional, national or international programmes to foster excellence in researchers' training, mobility and career development, spreading the best practices of the Marie Sklodowska-Curie actions. This will be achieved by co-funding new or existing regional, national, and international programmes to open up to, and provide for, international, intersectoral and interdisciplinary research training, as well as transnational and cross-sectoral mobility of researchers at all stages of their career.</p> <p>Scope:</p> <p>Each proposal funded under the COFUND scheme must have a sole beneficiary that will be responsible for the availability of the necessary complementary funds to execute the proposal.</p> <p>Applicants submit multi-annual proposals for new or existing doctoral programmes or fellowship programmes which are expected to have an impact on enhancing research- and innovation related human resources on regional, national or international level.</p> <p>Applicants having benefited from COFUND under previous calls (under the Seventh Framework Programme or under Horizon 2020) must explain how their proposal adds value in relation to the excellence and/or the impact award criteria, compared to their previous grant(s). As an example, added value could take the form of increased networking with organisations in less represented countries or capacity building measures there to further structure the European Research Area.</p> <p>Researchers supported under this scheme shall comply with the mobility rules of the Marie Sklodowska-Curie actions.</p> <p>Limitations regarding the researchers' origin and destination should be avoided. Support cannot be awarded to researchers who are already permanently employed by the organisation hosting them.</p> <p>Proposed programmes are encouraged to cover all research disciplines ("bottom-up"), but can also focus on specific disciplines. In this case the range of covered disciplines should allow reasonable flexibility for the researchers.</p> <p>Programmes that prioritise specific research disciplines based on national or regional Research and Innovation Strategies for Smart Specialisation (RIS3 strategies) can also be supported. Synergies with the European Structural &amp; Investment Funds (ESIF) are encouraged[1].</p> <p>COFUND takes the form of:</p> <p>A) Doctoral programmes</p>

**Νέες προσκλήσεις υποβολής προτάσεων σε ερευνητικά προγράμματα**

Doctoral programmes address the development and broadening of the research competencies of early-stage researchers. The training follows the EU Principles on Innovative Doctoral Training. Substantial training modules, including digital ones, addressing key transferable skills common to all fields and fostering the culture of Open Science, innovation and entrepreneurship will be supported. Collaboration with a wider set of partner organisations, including from the non-academic sector, which may provide hosting or secondment opportunities or training in research or transferable skills, as well as innovative and interdisciplinary elements of the proposed programme, will be positively taken into account during the evaluation. Each researcher must be enrolled in a doctoral programme. Attention is paid to the quality of supervision and mentoring arrangements as well as career guidance. The selection procedure for doctoral candidates must be open, transparent and merit-based. The vacancy notice must include the minimum gross salary offered to the researcher, as set out in the proposal.

**B) Fellowship programmes**

Fellowship programmes fund individual research training and career development fellowships for experienced researchers. The programmes supported should have regular selection rounds following fixed deadlines or regular cut-off dates, allowing fair competition between the researchers applying. The selections should be based on open, widely advertised competition (the vacancy notice must include the minimum gross salary offered to the researcher, as set out in the proposal), with transparent international peer review and the selection of candidates on merit. Mobility types supported by fellowship programmes may be similar to the ones supported under Marie Skłodowska-Curie Individual Fellowships. On top of transnational mobility, applicants are encouraged to include elements of cross-sectoral mobility and interdisciplinarity into their programmes. Fellowship programmes should be based on individual-driven mobility, i.e., researchers should be able to freely choose a research topic and the appropriate organisation to host them, fitting their individual needs.

Given that the aim of the co-funded fellowship programmes is the support of individual fellows, research teams will not be funded.

### Νέες προσκλήσεις υποβολής προτάσεων σε ερευνητικά προγράμματα

Τα κριτήρια αξιολόγησης των προτάσεων για πρόσβαση στους διαθέσιμους πόρους είναι:

K1 – Επιστημονική αριστεία: Η προτεινόμενη έρευνα θα πρέπει να αφορά εργαλεία και μεθοδολογίες κορυφαίας ποιότητας, σύμφωνα με τη διεθνώς αποδεκτή επιστημονική και τεχνολογική πρακτική, και να έχει δυναμική για σημαντικό αντίκτυπο στην ερευνητική κοινότητα ή/και στην κοινωνία.

K2 – Ανάγκη χρήσης: Οι προτάσεις θα πρέπει να αποδεικνύουν την ανάγκη χρήσης των υπερ-υπολογιστικών πόρων του συστήματος ARIS.

K3 – Επάρκεια: Η ωριμότητα και εμπειρία του κύριου ερευνητή (Principal Investigator) και της ομάδας του, στη χρήση υπέρ-υπολογιστικών συστημάτων, που θα εξασφαλίζει την επιτυχή ολοκλήρωση του έργου.

K4 – Εφαρμοσιμότητα: Η δυνατότητα υλοποίησης του έργου στο σύστημα ARIS, βάσει της τεχνικής αξιολόγησης και της διαθεσιμότητας πόρων.

Επιλεξιμότητα

Δικαίωμα υποβολής πρότασης έχουν οι επιστήμονες και ερευνητές που ικανοποιούν/αποδέχονται τις παρακάτω προϋποθέσεις επί ποινή αποκλεισμού:

Ως Κύριος Ερευνητής (Principal Investigator/ΚΕ) του έργου πρέπει να οριστεί ερευνητής ο οποίος εργάζεται σε ελληνικό ακαδημαϊκό ή ερευνητικό ίδρυμα.

Ως συνεργάτες στις προτάσεις μπορούν να συμμετέχουν επιστήμονες συνδεδεμένοι με ιδρύματα σε όλο τον κόσμο.

Προτίθενται να δεσμευθούν για τη χρήση των πόρων που θα διατεθούν στο σύστημα, καθώς και για την παροχή αναφοράς στις εργασίες τους, με βάση τα προτεινόμενα χρονοδιαγράμματα (βλ. παρακάτω).

Αναγνωρίζουν τη χρήση του συστήματος ARIS του ΕΔΕΤ, σε όλες τις δημοσιεύσεις σχετικά με τα αποτελέσματα που λαμβάνονται από τη χρήση των διατιθέμενων πόρων.

αναγνωρίζουν το δικαίωμα του ΕΔΕΤ να δημοσιοποιήσει την περίληψη του έργου καθώς και τα τεχνικά αποτελέσματα απόδοσης των εφαρμογών στο σύστημα ARIS.

Κατανομή Υπολογιστικών Πόρων (Core Hours)

Στο πλαίσιο της παρούσας πρόσκλησης θα διατεθούν συνολικά 41 εκατομμύρια core hours (ώρες χρήσης επεξεργαστικών πυρήνων) του ARIS. Πιο αναλυτικά, κάθε νησίδα μπορεί να διαθέσει τα εξής:

νησίδα κόμβων thin nodes: 30 εκατομμύρια core hours

νησίδα κόμβων fat node: 7 εκατομμύρια core hours

νησίδα κόμβων GPU: 3 εκατομμύρια core hours

νησίδα κόμβων Intel Xeon Phi: 1 εκατομμύριο core hours

Προτάσεις έργων, στις οποίες η πλειοψηφία των εργασιών απαιτούν λιγότερο από 2 thin κόμβους για την εκτέλεσή τους, θα βαθμολογηθούν χαμηλότερα με βάση το κριτήριο K2 για την «Ανάγκη Χρήσης» των υπέρ υπολογιστικών πόρων του ARIS.

organisation, may apply for funding for learning mobility of young people and youth workers as well as for Strategic partnerships in the field of youth.

The following Programme Countries can fully take part in all Erasmus+ Programme actions (1):

- the Member States of the European Union,
  - the EFTA/EEA countries: Iceland, Liechtenstein and Norway,
  - EU candidate countries: Turkey and the former Yugoslav Republic of Macedonia
- In addition, certain Erasmus+ Programme actions are open to organisations from partner countries.

Please refer to the Erasmus+ Programme Guide for further details on the modalities of participation.

For British applicants: Please be aware that eligibility criteria must be complied with for the entire duration of the grant. If the United Kingdom withdraws from the EU during the grant period without concluding an agreement with the EU ensuring in particular that British applicants continue to be eligible, you will cease to receive EU funding (while continuing, where possible, to participate) or be required to leave the project.

**4. Budget and duration of projects**

The implementation of this call for proposals is subject to the following conditions:

- The availability of the appropriations provided for in the draft budget for 2018 after the adoption of the budget for 2018 by the budgetary authority or if the budget is not adopted as provided for in the system of provisional twelfths.
- The adoption by the European legislative authority of the 2018-2020 Multiannual Indicative Programmes (MIPs) without any significant modifications.

The total budget earmarked for this call for proposals is estimated at EUR 2 490,9 million: Education and Training: EUR 2 253,2 million (2)

Youth: EUR 188,2 million

Jean Monnet: EUR 12,1 million

Sport: EUR 37,4 million

The total budget earmarked for the call for proposals as well as its repartition is indicative and may be modified subject to an amendment of the Erasmus+ Annual Work Programmes. Potential applicants are invited to regularly consult the Erasmus+ Annual Work Programmes and their amendments, published on:

[http://ec.europa.eu/dgs/education\\_culture/more\\_info/awp/index\\_en.htm](http://ec.europa.eu/dgs/education_culture/more_info/awp/index_en.htm) as regards the available budget for each action covered by the call.

	<b>Προθεσμία Υποβολής:</b>	<b>12-09-2018</b>
	<b>Περίληψη Πρόσκλησης:</b>	<p>Objective:</p> <p>The goal of the Individual Fellowships is to enhance the creative and innovative potential of experienced researchers, wishing to diversify their individual competence in terms of skill acquisition through advanced training, international and intersectoral mobility.</p> <p>Individual Fellowships provide opportunities to researchers of any nationality to acquire and transfer new knowledge and to work on research and innovation in Europe (EU Member States and Horizon 2020 Associated Countries) and beyond. The scheme particularly supports the return and (re)integration of European researchers from outside Europe and those who have previously worked here, as well as researchers displaced by conflict outside the EU and Horizon 2020 Associated Countries. It also promotes the career restart of individual researchers who show great potential.</p> <p>Scope:</p> <p>Support is foreseen for individual, trans-national fellowships awarded to the best or most promising researchers of any nationality, for employment in EU Member States or Horizon 2020 Associated Countries. It is based on an application made jointly by the researcher and the beneficiary in the academic or non-academic sectors.</p> <p>Only one proposal per individual researcher per call will be evaluated.</p> <p>Fellowships take the form of European Fellowships or Global Fellowships. European Fellowships are held in EU Member States or Horizon 2020 Associated Countries and are open to researchers either coming to Europe from any country in the world or moving within Europe. The researcher must comply with the rules of mobility in the country where the European Fellowship is held.</p> <p>Direct return to and long-term reintegration of researchers in Europe, including in their country of origin, is supported via a separate multi-disciplinary reintegration panel of the European Fellowships. For the reintegration panel, there must be direct mobility to the country of the beneficiary in Europe from a third country (compulsory national service and/or short stays such as holidays are not taken into account).</p> <p>Support to individuals to resume research in Europe after a career break, e.g. after parental leave or due to recent migration, is ensured via a separate multi-disciplinary career restart panel of the European Fellowships. To qualify for the career restart panel, researchers must not have been active in research for a continuous period of at least 12 months within the 18 months immediately prior to the deadline for submission.</p> <p>Researchers seeking to work on research and innovation projects in an organisation from the non-academic sector will be supported via a separate multi-disciplinary</p>

**Νέες προσκλήσεις υποβολής προτάσεων σε ερευνητικά προγράμματα**

society and enterprise panel of the European Fellowships. The objective of this panel is to facilitate career moves between the academic and non-academic sectors, to stimulate innovation, and to open attractive career opportunities for researchers outside academia.

The Widening Fellowships implemented through Work Programme part 15, Spreading Excellence and Widening Participation, provide specific support to researchers to undertake their fellowship in a widening country[1]. This will help spread excellence and close the still apparent research and innovation gap within Europe.

Global Fellowships are based on a secondment to a third country and a mandatory 12 month return period to a European host. The researcher must comply with the rules of mobility in the country where the Global Fellowship secondment takes place, not for the country of the return phase.

Researchers receiving an Individual Fellowship may opt to include a secondment phase in Europe, notably in the non-academic sector, within the overall duration of their fellowship. For a fellowship of 18 months or less, the secondment phase may last up to three months. For a fellowship of more than 18 months, the secondment phase may last up to six months. The secondment phase can be a single period or be divided into shorter mobility periods. The secondment should significantly add to the impact of the fellowship. In the Global Fellowships, such a secondment can also take place at the start of the action at the beneficiary or a partner organisation in Europe for a maximum of 3 months, allowing the researcher to spend time there before moving on to a partner organisation in a third country.

A Career Development Plan should be established jointly by the supervisor(s) and the researcher. In addition to research or innovation objectives, this plan comprises the researcher's training and career needs, including training on transferable skills, teaching, planning for publications and participation in conferences.

Researchers participating in the Individual Fellowships may opt to work part-time in order to pursue supplementary activities. These might include creating a company, or engaging in advanced studies not related to the MSCA grant. Any supplementary activities carried out part-time in parallel with the MSCA action must be agreed upon by the researcher and the beneficiary.

	<b>Προθεσμία Υποβολής:</b>	<b>14-02-2018</b>
	<b>Περίληψη Πρόσκλησης:</b>	<p>Objective:</p> <p>The European Researchers' Night aims to bring researchers closer to the general public and to increase awareness of research and innovation activities, with a view to supporting the public recognition of researchers, creating an understanding of the impact of researchers' work on citizen's daily life, and encouraging young people to embark on research careers.</p> <p>Scope:</p> <p>The European Researchers' Night takes place yearly, typically starting on the last Friday of the month of September, and is the occasion for a Europe-wide public and media event for the promotion of research careers, in particular towards young people and their families. Supported main events can last up to two full days: they can start on Friday and continue the following day. Pre-events can also be organised during spring or summer, prior to the main event in September.</p> <p>Activities focus on the general public, addressing and attracting people regardless of the level of their scientific background, with a special focus on pupils and students. Activities can combine education aspects with entertainment, especially when addressing young audiences. They can take various forms, e.g. hands-on experiments, science shows, simulations, debates, games, competitions, quizzes, etc. The European Parliament and the Council designated 2018 as the 'European Year of Cultural Heritage'. As a consequence, applicants are encouraged to include activities relating to cultural heritage, where appropriate, in their events.</p> <p>Where appropriate, engagement with educational institutions should be sought in order to encourage formal and informal science education with the aim to improve the scientific knowledge base.</p> <p>Each proposal should set up at least one European corner, providing general information about the European Union and how the EU funds science and education cooperation within Europe and beyond. Activities should be organised with researchers actively involved and directly in contact with the public. They should promote the European dimension, gender balance and inclusion in research and innovation. Involvement of researchers funded by Horizon 2020, including the Marie Sklodowska-Curie actions, is highly encouraged.</p> <p>Participants can be any legal entity in the EU Member States and Horizon 2020 Associated Countries, and/or if relevant, constitute a partnership at regional, national or international level. The maximum duration of support will be two years from the starting date specified in the grant agreement. Proposals should cover two editions of the Night in successive years, but single editions will also be considered. Expected Impact:

Increased awareness among the general public of the importance of research and innovation and more favourable general attitude towards its public funding

Better understanding of the key benefits that research brings to society

Reduction in the stereotypes about researchers and their profession

Increase, in the long term, of people taking up research careers

Better understanding of the European Union among the general public

	<b>Περίληψη Πρόσκλησης:</b>	The goal of the Individual Fellowships is to enhance the creative and innovative potential of experienced researchers, wishing to diversify their individual competence in terms of skill acquisition through advanced training, international and intersectoral mobility. Widening fellowships, in particular, provide specific support to researchers to undertake their fellowship in a widening country. This will help spread excellence and close the still apparent research and innovation gap within Europe. Topics Called: WF-01-2018: Widening Fellowships WF-02-2019: Widening Fellowships
