| Ημερομηνία Δημοσίευσης: | 08/05/2023 |

Προθεσμία Υποβολής: 17/10/2023

Περίληψη Πρόσκλησης:

Expected Outcome:

In line with the new European Innovation Agenda's flagship on accelerating and strengthening innovation in European Innovation Ecosystems across the EU and addressing the innovation divide, this action is intended to create connected regional innovation valleys across the European Union (EU), involving regions with lower innovation performances, by building on strategic areas of regional strength and specialisation (defined in their smart specialisation strategies), in support of key EU priorities. Successful applicant regions under this call topic will be recognised as "regional innovation valleys".

Projects results are expected to contribute to all of the following expected outcomes:

-Open, efficient, inclusive and interconnected innovation ecosystems across the EU in line with the New European Innovation Agenda, building on their diversities and complementarities, enhancing the joint definition of visions and strategies involving actors from across the quadruple helix, based notably on their respective national/regional smart specialisation strategies, and strengthening their efficiency and potential to innovate.

-Enhanced synergies, complementarities and cooperation among European innovation ecosystems around strategic areas, technologies and challenges of common European interest, build on Smart Specialisation Strategies and, where applicable, on the participation in the pilot Partnerships for Regional Innovation (PRIs)), the creation of common knowledge assets within regional innovation valleys, and support to their cross-border connectedness.

-Increased innovation capabilities, including in deep tech in Member States and Associated Countries, allowing innovators to bring their ideas to the market and enable innovations to be scaled up at EU level, and facilitating the link with the private sector and other research and innovator actors.

-Better links between innovation 'leaders' and 'strong' innovator regions with 'moderate' and 'emerging' innovator regions across the EU and Associated Countries.

Ενημέρωση για τα ερευνητικά προγράμματα

Αναλυτικός Κατάλογος

21/07/2023

-More innovation co-investments, mobilising other funding leverages, including European, national or regional public funds and/or other private funds, to complement Horizon Europe support.

-Increased participation of all innovation ecosystems actors across EU territories in technology and industrial value chains (existing and emerging ones) relevant to the EU twin green and digital transition to achieve broader sustainability and the EU's open strategic autonomy.

Scope:

Target group(s): The topic is primarily focused on the regional aspects of innovation and targeted at national and/or regional innovation authorities. Other relevant entities should participate in the consortia as associated partners (such as research institutions, public authorities, universities, companies, clusters, innovation intermediaries, etc.).

The aim of this topic is to foster the creation of efficient, open, inclusive and interconnected European innovation ecosystems in line with the New European Innovation Agenda, notably in thematic/technological areas (including deep tech) that will be critical for EU value chains. It will also contribute to the twin green and digital transition and a resilient society, and to the net-zero objective, particularly in the areas of reducing reliance on the fossil fuels, increasing global food security, mastering the digital transformation (including cybersecurity), improving healthcare, and achieving circularity.

The topic will support strategically oriented long-term programmes of activities (action plans) to enable authorities in charge of public national, regional, or local innovation policies and programmes, with the participation of the private sector and research and innovation actors, to implement joint activities towards innovation development and deployment, aimed at tackling challenges at EU, national, regional, and local level.

Προθεσμία Υποβολής: **28/09/2023**

Περίληψη Πρόσκλησης:

Expected Outcome:

Improving knowledge diffusion, technology uptake and having spill-over effects is fundamental to ensure that researchers and their institutions build on and valorise the latest available knowledge. Moreover, the exploitation of research results and the creation of value for our economy and society, often depend on the skills and abilities of the beneficiaries as well as the intermediaries (i.e., technology/knowledge transfer officers) to present and connect to those stakeholders that can help them take the results into the next level. Especially in Widening countries, R&I actors lack sufficient support and information, skills or connections to the right stakeholders and these gaps can jeopardise their ability to maximise the potential value of their results.

Dissemination & Exploitation (D&E) policy of Horizon Europe can act as an enabler for the implementation of the political objectives of this programme component. Therefore, this action focuses on activities to strengthen or build D&E capacities in Widening countries. It will provide beneficiaries of the ongoing portfolio of projects funded mainly under the programmes: Spreading excellence and Widening Participation under Horizon 2020 and the widening component of Horizon Europe with further opportunities for scaling up their research results and improve the sustainability of their actions. This includes innovations that can translate into / contribute to new products and services that create economic or social value, more efficient production or distribution processes; and results that can feed into policymaking and help citizens and public authorities. The action is framed by a broader D&E policy and will support our beneficiaries towards the maximum dissemination and exploitation of their results in the context of Horizon Europe.

Προθεσμία Υποβολής: **28/09/2023**

Περίληψη Πρόσκλησης:

Scope:

The Hop On Facility integrates one additional participant from a Widening country to an ongoing project under Pillar 2 or the EIC pathfinder scheme while topping up a relevant task or work package and the cost incurred by the additional participant. This will happen on a voluntary basis without affecting the freedom of choice for the consortium and the principle of excellence. The Hop On Facility is open to all topics under Pillar 2 and the EIC pathfinder. Applications with activities that contribute to the policy objective of the transition towards a green and digital economy are especially encouraged.

The action will be part of an existing project with a valid Grant Agreement. Applications must demonstrate the R&I added value of the new partner and present a visible and distinct work package for the acceding partner. The proposal should include a detailed description of the profile of the new partner and its role in the existing project. The additional partner and task should be presented in a dedicated proposal template with the Description of the Action (DOA) of the ongoing action uploaded as an annex. Selected consortia will be invited to submit an amendment request for accession of a new partner, modification of the description of the action and upgrade of the budget.

The budget increase must be exclusively for the benefit of the new partner with the exception of a coordination fee of up to 10% of the increased budget to be allocated to the coordinator of the consortium. The coordinator may request the coordination fee and provide an explanation on the additional integration efforts for the new partner.

Mission: Restore our Ocean, seas and waters by 2030

The Mission 'Restore our ocean and waters by 2030' will provide a systemic approach for the restoration, protection and preservation of our ocean, seas and waters. The objective of this Mission is to restore, protect and preserve the health of our ocean, seas and waters by 2030. The Mission is designed to deliver on the European Union's 2030

Ενημέρωση για τα ερευνητικά προγράμματα

quantified and measurable targets for protecting and restoring ecosystems and biodiversity, for zero pollution, and for decarbonisation and net greenhouse gas emissions reduction towards climate-neutrality, within the EU's ocean, seas and waters. The Mission will support many Sustainable Development Goals (SDGs): in particular restoring our ocean and waters related actions will directly contribute to SDG 14 - Life below water and SDG 6 - Clean water and sanitation, as well as to SDG13 - Climate action. The Mission will also contribute to the UN Decade of Ocean Science for Sustainable Development [[<https://www.oceandecade.org/>]] by fostering research and cooperation across European sea basins, including the EU Outermost Regions and beyond, and mobilise scientists, as well as citizens for a sustainable and healthy ocean, seas and waters.

The Mission Work Programme, under Horizon Europe, will contribute to the recovery of our ocean and waters by 2030 and more specifically to the following objectives:

-Protect and restore marine and freshwater ecosystems and biodiversity, in line with the EU Biodiversity Strategy 2030[[COM/2020/380 final]];

-Prevent and eliminate pollution of our ocean, seas and waters, in line with the EU Action Plan Towards Zero Pollution for Air, Water and Soil[[COM/2021/400 final]];

-Make the sustainable blue economy carbon-neutral and circular, in line with the proposed European Climate Law[[COM/2020/563 final]] and the holistic vision enshrined in the Communication on a new approach for a Sustainable Blue Economy[[COM/2021/240 final]].

Περίληψη Πρόσκλησης: Expected Outcome:
This topic aims at supporting activities that are enabling or contributing to several expected impacts of destination 3 "Tackling diseases and reducing disease burden". To that end, proposals under this topic should aim for delivering results that are directed, tailored towards and contributing to all of the following expected outcomes:
-The EU is reinforced as an internationally recognised driver of research and innovation in rare diseases (RD) and thereby substantially contributing to the achievement of the Sustainable Development Goals related to rare diseases;
-Research funders align, adopt and implement their RD research policies allowing for the optimal generation and translation of knowledge into meaningful health products and interventions responding to the needs of people living with a rare disease across Europe and globally.
-The RD research community at large benefit from and use an improved comprehensive knowledge framework integrating the EU, national/regional data and information infrastructures to improve translational research.
-People living with a rare disease benefit from a more timely, equitable access to innovative, sustainable and high-quality healthcare, taking stock of highly integrated research and healthcare systems.
-Researchers, innovators - as well as people living with a rare disease and their advocates (as co-creators) - effectively constitute and operate into an integrated research and innovation ecosystem to deliver cost-effective diagnosis and treatments.
-Public and private actors, including civil society (e.g. NGOs, charities), establish coordinated and efficient multi-stakeholder collaborations at EU and national (including regional) levels, allowing for more effective clinical research, for example aiming at improved success rates of therapeutic development.

Προθεσμία Υποβολής: **13/09/2023**

Περίληψη Πρόσκλησης:

Scope:

Fellowships should be provided to excellent researchers, undertaking cross-border mobility. Applications must be made jointly by the researcher together with a legal entity in the academic or non-academic sector located in a Widening Country.

ERA Fellowships should take place in a Widening Country. Fellowships are open to researchers of any nationality who wish to engage in R&I projects by either coming to the EU from any country in the world or moving within the EU to a Widening Country.

In order to apply for the ERA Fellowships call, applicants must submit their proposal to the Marie Skłodowska-Curie actions (MSCA) Postdoctoral Fellowships 2023. To be eligible to this call the host organisation must be located in an eligible Widening country. The application to the (MSCA) Postdoctoral Fellowships 2023 will be automatically resubmitted to this call in case the proposal fails to reach an adequate place in the ranking to be funded. This simplified submission procedure to the ERA Fellowships call presents applicants moving to Widening countries with an additional funding opportunity but there is the possibility to opt out during the application stage.

The proposals submitted under the ERA Fellowships must fulfil all the admissibility and eligibility conditions of the MSCA Postdoctoral Fellowships 2023 and pass all the thresholds for that call.

ERA Fellowships will be implemented applying the award criteria, scoring and threshold for Marie Skłodowska-Curie actions. The ranking order for the ERA Fellowships call will follow the MSCA Postdoctoral Fellowships 2023 call scores and evaluation procedure and proposals will also retain the scores and comments included in the Evaluation Summary Report (ESR) of this call. The MSCA Postdoctoral Fellowships 2023 model grant agreement will be used to the ERA Fellowships.

| Περίληψη Πρόσκλησης: | <p>This call covers the following topics:</p> <ul style="list-style-type: none">- DIGITAL-2023-SKILLS-04-BOOSTINGDIGIT: Boosting Digital Skills of young pupils, in particular girls- DIGITAL-2023-SKILLS-04-SEMICONDUCTORS: Reinforcing skills in semiconductors <p>Scope:</p> <p>The aim of this action is to pilot actions to increase the number of students pursuing digital studies and careers, with a special focus on increasing participation of girls. It will support joint actions between leading technical higher education institutions, businesses and schools to promote digital studies, through hands-on activities and challenge-based projects. Another aim of this action is to scale-up the EU Code Week initiative, putting it on stronger and broader footing, thus further increasing its impact beyond the > 4 million people reached every year, among which almost half are young women and girls. For example, the actions will finance summer schools for high-school students on digital areas, career days for people interested in digital, with a view to encourage more gender diversity and promote exchanges between higher education institutions and primary and secondary schools on digital topics. Digital Europe Programme consortia already awarded under the first WP could also be leveraged, with a view to give the possibilities to younger students to access the state-of-the-art laboratories, experience the campus facilities and follow seminars from the most renowned experts in Quantum computing, Cybersecurity, AI, cloud, among others. Special attention should be given to the role of girls and women in the digital field, with a focus on debunking stereotypes and tackling the self-efficacy and confidence gap.</p> <p>This action is in line with Action 13 of the Digital Education Action Plan (2021-2027), which aims to enhance girls and women's digital competences through projects like Girls Go Circular and ESTEAM Fests.</p> |
